Dear Ms. Staiger:

As a resident of Staten Island I want Alternative 2: to be used to remediate and clean up the John J. Jewett & Sons White Lead Company/Seduttos Ice Cream Factory Site, located at 2000 Richmond Terrace, Port Richmond, Staten Island, NY. 10302.

"Alternative 2: Excavation and Off- Site Treatment/Disposal,
Under this alternative, the contaminated soils and waste materials would be excavated and transported off- Site for treatment/disposal. The excavated areas would be backfilled with clean fill and re vegetated."

Alternative 2 remediation and cleanup: will finally allow for this community to move forward and not have to continually live in fear of lead exposure from this particular location - regardless of who the owner is, or how the property will be developed in the future. This property will finally have a clean slate to work from.

Sincerely,

Mildred Dorta
